Seminars/Workshops/Certificate Courses/Professional Training Programmes/Webinars/E-Quiz attended	
Papers Presented	NA
Methods followed in classroom teaching	Same as before in case of classroom teaching till Lockdown was declared in 22 nd March 2020. Thereafter during Lockdown I took classes in online format through Google Meet. Materials were uploaded in college website.
Any innovative ideas introduced to improve teaching learning	In online mode of teaching I ask individual student to present a topic (which has already being taught) to the rest of the class, as we did it in the offline mode also, to understand how far they have understood & amp; this also boosts up their confidence. Along with lecture PPT presentation & amp; screening of film clips is being done regularly from Youtube and other sites. Whatsapp group with the students has become a very helpful mode of communication during this pandemic situation.
Academic and personal guidance and counseling of the students	Regular counseling of students was necessary at the beginning of the pandemic as majority got panicked by this unprecedented situation.
